

going the distance for gender equality

Propose a change to the events and leagues you and your club compete in that are not equal at their AGM or relevant decision making forum

Here is a template:

Our club believes that a key principle of our running community and the races and leagues we compete in is that women and men should have equality of competition opportunities and experiences.

With this principle in mind our club propose that this race/league should ensure it offers equal race distances, age categories, prizes and status for women and men.

Specifically for this race/league this means (delete as necessary):

Senior race distances should be equalised

Junior race distances (by age category) should be equalised

Veteran age categories should be equalised to V40, V50, V60 etc for all

Women's and men's prizes should be equalised

We propose that it is for the event organiser to decide what the most appropriate equal distance should be based on their knowledge of their event and logistics. We will support your decision as long as the main principle of equality is upheld.
